Profile

Dedicated Full Stack Web Developer with a strong background in printing and project management, bringing a unique perspective to problem-solving and attention to detail. Passionate about building innovative, mobile-first applications, I specialize in JavaScript, React.js, Node.js, and software testing. My experience includes leading technical instruction, mentoring teams, and fostering growth in aspiring developers. With a growth mindset and a commitment to teamwork, I thrive in dynamic environments where I can drive projects from concept to execution.

EXPERIENCE

April 2022 – April 2024 | **Generation USA (Now Choose U) | Washington DC** | *Lead JWD Instructor*

- Design and Facilitate Lesson plans on technical topics including: Git Workflow, Semantic HTML, CSS, JavaScript, Object-Oriented Programming, Test-Driven Development, and React.js with modules consisting of Rendering JSX, state management, and the creation of custom hooks.
- Manage a team of four Teaching Assistants through the creation and implementation of a comprehensive Pre-Work module for Generation USA to better aid each new learner in a successful cohort.

October 2021 - April 2022 | **Generation USA (Now Choose U) | Washington DC** | *Teaching Assistant*

- Facilitate technical and soft skill lesson plans for the Junior Web Developer Cohort to 100 learners.
- Continually served as a helpful and enthusiastic assistant with a proven track record of completing work in a timely and professional manner. Promoted to Lead Instructor in 6 Months.

May 2015 - June 2020 | **Haman Midwest | Columbus, OH** | *Bindery Specialist/ Project Manager*

- Worked with 20 high profile clients to deliver the highest quality in commercial printing needs.
- Effectively directed and oversaw staff, designing schedules to meet the needs of the department as well as the needs of employees.
